## Heat Your Home the RoToR Way

The Biggest Improvement in  
Scientific Heating in 50 Years

The RoToR Combustion Plate is a new invention that takes the place of Coal and Wood Grates and enables you to burn the smallest size or lowest priced coal for your home, and at the same time gives maximum heating efficiency.

Here's what RoToR Heating will do for you:

It will extract 17 per cent more heat from any kind of coal than is possible with ordinary grates.

It will burn Barley, Buckwheat, Pea and all other small size, cheap coals and coke, absolutely without waste—as well as large sizes of coal and wood fuels.

It will do this without necessity for repairs, servicing or adjustment. Rotor withstands heating tests which completely destroy the best grates. It cannot warp, burn out or get out of order.

It does away with ash sifting; the fuel burns to a fine powder ash, meaning an additional saving of 10 to 30 per cent on coal which is ordinarily wasted through grates.

## World Baseball Series Commenced Today

Philadelphia Athletics, champions of the American League, and St. Louis Cardinals, champions of the National League, meet today at Shibe Park, Philadelphia, for the first game in the World Series. The second game, scheduled for tomorrow, will also be played at Philadelphia. There will be no game Friday, when the teams will be travelling to St. Louis, where the third, fourth and fifth games are scheduled to be played on Saturday, Sunday and Monday, October 4-6, respectively. If any further games are necessary, they will be played off in Philadelphia on Wednesday and Thursday, October 8-9.

## Fall Chautauqua Starts Saturday Evening

Oyen's fall Chautauqua starts on Saturday evening with the play "Turn to the Right", played by the Martin Erwin Players.

On Monday, the Lowell Patton Artists will provide both afternoon and evening programmes. The inimitable Lowell Patton, pianist and composer, is supported by Esther Durham, coloratura soprano and Penwick Newell whose return to his concert tour is hailed with delight by all music lovers. The programmes of this talented trio is sure to be a great gift.

On Tuesday afternoon, the programme comprises a gala entertainment by the Elias Turbitzta Sorenaders, which should prove most popular. They also take the first part of the programme on Tuesday evening, and will be followed by Private Post, who delivers a great lecture "The Inexhaustible Lie".

Chautauqua closes on Wednesday evening with the dramatic comedy, "The Patsy", considered one of the biggest comedy hits of the stage. There is no afternoon performance on Wednesday.

Patrons may obtain season tickets from any member of the local committee, adults \$2, children \$1. No amusement tax. All programmes are given in Oyen Theatre, evenings at 8 p.m., afternoons at 3 p.m.

## Leo Watrin, Well Known Rider Passes After Accident

Leo Watrin, 21 well known cow boy and bucking horse rider, died last Friday evening at Holy Cross hospital as a result of injuries received when he was struck by a truck while changing a tire on his car on the McLeod trail south of Calgary.

Following the accident which occurred last Wednesday night, Watrin was rushed into the city to hospital, where it was found that his chest and ribs were caved in and his left leg broken at the thigh. Serious as his injuries were, recovery was believed possible, but the injured man took a turn for the worse Thursday and died the following evening. William Ross of Blackie, who was driving the truck that struck Watrin was arrested and charged with manslaughter.

Mr. Pete Watrin of Oyen left last Friday morning for Calgary, and in company with other members of the family was with his brother before he died.

## Prize Winning Essay

(By Miss Florence Moore)

The following essay by Miss Florence Moore, won first prize at the 1930 Oyen agricultural fair.

Agricultural societies are successful enterprises bringing to the citizens of their respective districts a more intimate knowledge of its agricultural conditions, shown through exhibits on display at its annual fairs.

Efficiency in any social life begins at home. The person who does not realize the value of this truth, cannot realize or appreciate the benefits of an Agricultural Society to a community. The society is a means of conveying to its members the advantages of competition in encouraging farmers to improve their farm products selecting the more useful breeds and varieties.

The keener interest shown yearly in exhibiting grains, stock, vegetables, fruits and domestic products, each with a marked improvement is ample proof of the success of competition.

The society forms a centre around which its members may study and discuss agricultural problems taking steps to improve the quality as well as the quantity of their products. It aims at high ideals and its fair dealings are recognized by the individual members as well as the people of the surrounding district as being the most important object of its activities.

The day set aside each year for the annual fair of each society gives the people an opportunity to meet their friends and neighbors spending a pleasant and profitable day.

The growth and achievements of an agricultural society cannot be over estimated. With each member doing his utmost to serve himself as an individual while recognizing at the same time the good of all is the greater object, the advantages of an Agricultural society to a district as a whole becomes more prominent yearly.

## The Recent Rainfall

The total rainfall recorded on the rain gauge last week was 2.38 inches. This is the heaviest rainfall of the year.

## FALL GOODS

Colder weather is setting in. You want warm clothing—and when you buy, past experience has taught you "It Pays to Buy the Best." We know produce prices are low, but our goods are well bought and are marked at low prices.

## We Handle the Best

Stanfields Underwear

G. W. G. Mackinaws and Overalls

Williams Work Boots

Kaufmans Rubbers

House of Hobberlin-Clothing

and you know it Pays to buy the Best.

Ladies! A large showing of new Fall Coats just opened. Good Values.

Mrs. M. Dennison of the Gossard Corset will be at our store Thursday, October 2. Phone for appointment.

During Chautauqua our store will remain open in the evenings till 10 p.m. and reopen for a short time after night programmes are concluded.

## Old Dug-Out Rests From World Cruise

The old "Tilicum", battered and storm-torn, but still gallant under its new coat of paint, was brought from a marine graveyard on the banks of the Thames, London, recently, and placed on public inspection in front of the famous Crystal Gardens, Victoria, B.C., where it is becoming one of the sights of the British Columbia capital. The old dug-out canoe was built by Indians near Victoria more than 120 years ago and a century later carried Captain J. C. Voss and N. K. Luxton, Banff newspaperman, on a round-the-world trip in 1901 of 40,000 miles, weathering typhoons in the Pacific and hurricanes in the Atlantic. The canoe was brought to Victoria through the efforts of George J. Warren, commissioner, and other officials of the Victoria and Vancouver Island Publicity Bureau. Picture shows close-up of the old dug-out.

## Radio Telephone Links

London Will Be Hub of World Phone Service

"Hello, Central, this is London speaking. Will you please connect me with Bombay?"

Two more radio telephone links from London are expected to come into operation shortly, and taking into account efforts by Germany to get into telephone touch with the Far East, this will mean that the whole world will have been joined up by voice links, with London as the hub of the service.

Work on an extension from Australia to New Zealand has been commenced, and if successful, 180,000 telephones will be brought into the international circuit. Arrangements for a service to India are still being negotiated, but once these are made, it is anticipated that the installation of a special transmitter in India will not take more than three or four months.

In the first place, the service will probably be only to Bombay, but extensions will quickly follow to the United Provinces and the Valley of the Ganges, from Calcutta to the Northwest Frontier, Madras and eventually Burma will no doubt be brought in.

Another country which may be brought into the international circuit at any time is Egypt. Only the word of the Egyptian government is needed. From Egypt there would probably be extensions to Palestine and Transjordan.

Meanwhile the Telefunken Company of Germany is experimenting with a radio telephone link with Tokyo, and, if this is successful, an arrangement will immediately be made to "switch in" London. The Telefunken Company is also about to install a service to Scandinavia and the remainder of China.

The virtual completion of an international telephone service is now only a matter of months. South Africa will, of course, be brought into the system, though experiments have not yet commenced.

The total number of telephones in the world recorded in the last returns was 32,644,000. There are now probably 34,000,000, of which over 90 per cent. are connected with one another.

### Keeps Thousands Busy

Large Number Employed in British Columbia Salmon Industry

The Department of Fisheries estimates that more than 20,000 people are this season engaged in the salmon industry of British Columbia. Of this number 12,000 are fishermen and about 8,000 work in the fish-canning plants.

In addition hundreds of employees are engaged by the can manufacturing companies to make the millions of cans required by the fishing industry. Up to the present time 40,000 pounds of salmon alone have been caught.

### Bumper Potato Crop

There is a record crop of potatoes in Canada this year. It will total, according to the latest official estimate, 66,500,000 bushels, or 45 per cent. more than in 1929. Potatoes are grown in commercial quantities in all the provinces of Canada. In the Maritime Provinces—Nova Scotia, New Brunswick, and Prince Edward Island—potato growing is an important industry and a large percentage of the crop is exported to the West Indies and the Eastern and Southern States.

### Is Of Some Use

Spread of the miniature golf craze throughout the United States has been a great boost to the electric light companies through the use of approximately \$2,000,000 worth of electricity each month, according to figures compiled.

A garage fire in Brooklyn destroyed more than 100 autos. Many families lost everything they had.

"The children who annoy me least in the theatre are those that cry."

"Surely not?"

"Yes, because they are always taken out."—Gutteries, Madrid.

W. N. U. 1867

## A Trans-Canada Airway

Prediction Made By Controller Of Civil Aviation, Ottawa

Hope that before many years have passed Canada will have a trans-continental airway that is second to none, was expressed by J. A. Wilson, Controller of Civil Aviation, Ottawa, while air routes have been established in the east and in the west, said Mr. Wilson, there is still work to be done before the air is really "open." "We have the separate links," he said, "but we will not have the full benefit until the chain is completed."

Already there are 900 miles of lighted airways in Canada, stated Mr. Wilson, for night flying, and 300 more miles are being added this year. Reviewing flying conditions in Canada, Mr. Wilson paid tribute to the pilots who practically unknown to the public, are making outstanding contributions to national development in flying in the north country. "I hope," he said, "that a new Klipping will arise and write the story as it should be told."

Canada, he noted, has not been gaining fame for breaking world records in aviation, or for spectacular flights. "In fact," he said, "our flying is also breaking records, but you don't hear anything about them. The trade schools and the ordinary course of the day's work."

Referring to the air mail service, Mr. Wilson stated that mail taken from the boats at Rimouski, in place in Chicago before the boat docks in Quebec, "and," he said, "there is no reason why we should not have mail off further down and save another day. This is perfectly practicable."

## Objects To Red Bars

Wisconsin Men Shun Cost Of Paint-Work On Their Cars

Farmers in the country around Janesville, Wisconsin, must have been pleased when their rich neighbor, Mr. George S. Parker, called on him as an aid in painting their barns and other outbuildings. He wanted the general appearance of the country improved, and proved his desire by proposing to give part of the cost of painting to all farmers who would have the beautifying movement. To those who painted their barns any other color than red, he offered a larger portion of the cost than to others.

It was not long before the landscape was dotted with white barns. Cream or white seemed to be the only color suggesting itself to the farmers as a possible substitute for the familiar red. In fact, soon as a half dozen barns had turned pale, there was a protest from another resident of the locality. Mr. F. L. Wright, an architect, spoke up for red. He said there ought to be a law requiring red for barns, and he wrote an article on the subject for a local paper, declaring that "a farmstead is warned and given life by the red of the barns as they stand over the hills and yellow fields."

If the strongest feeling in the community now supports Mr. Parker, it is not an article on the subject, but the financial support of white ones. The two leaders are not really bitter in their attitude. Mr. Wright has sent for a noted designer to give an opinion, and insists that red barns are "a curse on Wisconsin's landscape."—New York Times.

## The Honey Crop

Shows Substantial Increase Both In Volume and Value

Honey production in Canada, despite a lowering price average, shows a big increase in both volume and value. The confederate has been due to the help provided apiarists through the research work of the Bee Division of the Dominion Department of Agriculture. In 1927 the nine provinces produced a total of 23,196,493 pounds of honey, selling at an average price of thirteen cents a pound, was worth \$3,026,528. In 1929 the production amounted to 30,975,735 pounds. This sold at an average price of eleven cents a pound, giving a crop value of \$3,402,837. Ontario is the largest single producer of honey, the annual crop amounting to 1,000,000 pounds, while Prince Edward Island produced only 14,000 pounds.

## Request Superfluous

The conjurer's turn had not been going too well. The audience received each trick in stony silence.

Not to be daunted, however, he stuck steadily to his task.

"Ladies and gentlemen," he said, "if any person will oblige me with an egg, I will perform an amazing disappearing trick."

Nobody was able to produce the article, and after a momentary pause a voice called out from the gallery:

"If anybody 'ere 'ad an egg, you'd 'ave got it long ago."

## London's Technical Schools Are Efficient

Tuition In Every Known Subject Can Be Given

London is rapidly becoming the best educational centre in Europe. Tuition in every subject can be obtained in its well-equipped technical schools. The London County Council has just appointed a visiting instructor to teach the theory and practice of machine and face massage to hair-dressing students.

"You cannot name any subject we do not teach," says an L.C.C. official to a press representative.

"Jewelry? We teach all about the polishing and cutting of stones, the ways of setting rings and brooches, and every aspect of the craft."

"Do you know that 25,000 Londoners study such subjects as psychology, astronomy and high-brow literature? London is an intellectually curious city, more so than anywhere else."

"Aeronautics? Well, we don't teach flying, but we study our engines and their maintenance and repair, and also the building of aeroplane bodies. There are three kinds of schools in London—the trade schools, for hobbies and those for the study of abstract and cultural subjects. The trade schools endow their pupils and girls for their right vocations."

"We work in conjunction with the trade unions and employers, and a few more boys who have learned a skilled trade at one of our schools are unemployed at present."

## Life In Village Or Town

Conditions Are Very Often Better Than In Big Cities

We are sometimes tempted to wonder why it is that so many people either do not see, or will not see, the obvious advantages of village or even of very small town life, especially in a period of scarcity and depression. Indeed, they crowded into the large cities where thousands have crowded before them think, apparently, that if a living is to be found anywhere it will be in the great centres of the population. Chaper living—rental, food, fuel, and sometimes, also, certain types of clothing—are the only advantages of village life. There are opportunities for turning the best penny that do not exist in the city.

## China Wants Leather Goods

A demand for leather in China within the near future, which should open a market for Canadian manufacturers, has been reported to the Department of Trade and Commerce by L. M. Cosgrave, Canadian trade commissioner at Shanghai. The disorderly condition of the country and the continued decrease in the price of silver has resulted in the denuding of the stocks of leather. This peculiarity has caused leather replacements will soon be required, he said.

## A Puzzle To Doctors

A girl who cries at jokes and laughs in time of trouble has been puzzling the doctors of Bordeaux, France. They believe that she has inverted muscles which, the medical men say, they cannot cure. Apart from this peculiarity she is healthy. But when her face is tear-stained her eyes register amusement, and when she smiles they reveal unapprising.

## Over-Production

A Peculiar Situation Wherein Want and Abundance Exist Side By Side

What's the matter with North America? Here the condition exists that multitudes are idle and hungry because there is over-production of foods and everything else. Want and abundance exist side by side. Want, in fact, the consequence of abundance.

There is an immense supply of wheat, but many of those, abroad and at home, who need it cannot afford to buy it. Of manufactured goods more have been made than can be sold.

Some attribute much of the trouble in so far as Canada, at least, is concerned, to "depression," and they attribute the depression to loss of confidence. The stock market collapse left a large and enterprising section of the people limp and dispirited. Lying on the installment plan has enabled all kinds of manufacturing to expand. People could buy almost anything by paying 10 per cent. down. The article so purchased was as effectively bought and sold as if it had been cash. The result was that the sales department of a factory sold, therefore, be 10 or 20 times the producing and selling that there would have been if the installment plan had not been introduced. It may be that this is where "depression" gets in its work. People who have lost confidence will not pay down 10 per cent. and obligate themselves to pay the other 90 per cent. later.

When a householder has an open-handed, confident, installment plan buying cases, over-production manifests itself instantly and piles up like the cars of a long railway train after the engine has collided with an immovable object.—Toronto Star.

## Tip For Beekapen

Combs Can Be Used Again After Honey Is Extracted

When a beekeeper lacks funds or cannot afford to purchase a new number of supers and frames for his spary, he may use the combs after the honey has been extracted from them. The honey should be taken from the combs as carefully as possible leaving only a thin film of honey still adhering to the insides of the cells. These wet combs should be returned to the bees, feeding them with as soon as possible. Wet combs attract the worker bees and at once they begin to store honey in them. The next step is to clean the jagged torn tops of the cells made by the uncapping knife will be gone over by the workers and soon made neat and even. At the end of the season surplus of empty wet combs may be taken from the colonies to be cleaned before storing them for winter.

## Many Trees Distributed

The number of settlers visited last year, by the inspectors of tree plantations, was 13,012, of whom 1,524 were in Manitoba, 7,771 in Saskatchewan, and 3,717 in Alberta. The total number of trees distributed by the Forest Service, Department of the Interior, since the inauguration of the scheme, in 1901, is 110,763,076; of these, 1,783,181 were conifers, and the remainder broad-leaved.

## Honor Goes To Columbus

Even If Norsemen Reached America First As Reported

Plenty of people who aren't too certain about anything else are pretty sure that it was Columbus who discovered America, and some of them believe it was in 1492. It is going to be pretty hard on them if Capt. Don Juan M. Macmillan, an explorer just back from his fifteenth voyage north, is right in his opinion that the Norsemen anticipated Columbus by four hundred years. Capt. Macmillan says there are all sorts of traditions to that effect among the Eskimoes of the Labrador coast, and it is along that coast that he is in quest of traces of these Norse discoverers.

Herod of Alexandria undoubtedly came on the principle of the steam-engine more than two centuries before Christ, but he did nothing about it, and James Watt seems to deserve any credit accruing under that head. The Norsemen may have anticipated Columbus by four hundred years, but they did nothing to make it count. So there is really nothing in rocking old world foundations. If our country body ever finally demonstrates that the Norsemen were here first, it will simply be to make us more equal to the world with the wonderful opportunity chance committed to their hands.—Edmonton Journal.

## An Underground Garden

Flowers and Fruit Grown Quickly Under Ultra-Violet Ray Lamps

The King and Queen recently visited a cellar at Cumberland Lodge, Windsor Great Park, where Lord and Lady Fitzalan have a wonderful underground garden. By means of two ultra-violet ray lamps and a floor specially prepared with soil and fertilizers, flowers and fruit are grown to perfection in a remarkably short space of time. Mr. Ferris, the head gardener, told the King and Queen, who were amazed at the results obtained, that they had daffodils in flower in the second week in January and as many strawberries as were required by March 12. The cellar is kept at a moderate temperature, and the flowers and fruit are seldom given more than eight hours a day of the ultra-violet rays. It is stated that there are only two similar gardens in existence—one in Sussex, and the other in New York.

## A Big Service

The Department of Agriculture at Ottawa through its Publications Branch last year distributed to farmers all over Canada free of charge a total of 4,361,370 publications, bulletins, circulars and reports. In addition to this material 226 press articles and 198 magazine features were supplied. This is one of the ways in which the farmer is helped with his problems and kept in close touch with the condition of his markets and important new developments in agriculture.

## Unsinkable Boat Tested

Tests of the new unsinkable boat over Lake Constance, Germany, are declared to have been successful. The boat resembles a cross between a dirigible and a submarine. It is divided into six water-tight compartments, with a water-tight cabin on top of them. A weight below helps to maintain stability.

## Experiment Should Be Interesting

Northern Saskatchewan Schools Trying Experiment Which Has Real Value

An experiment in education is being made in certain high schools in Northern Saskatchewan that appears to have real value. It should be of interest to parents and the general public.

The experiment has to do with the need for some guidance for high school boys and girls in relation to their future life task. Certain interfering principals of high schools are setting out to recognize the opportunity of the high school in this matter and to meet a need that anyone who has to do with older boys and girls knows well does exist. One principal has outlined a scheme whereby local representatives of various trades and professions will speak on the profession to which they belong and indicate its opportunities and the way in which it can be entered. In many cases boys and girls will be made to see the work and promise for usefulness of the leading vocations and should be led to select a life task that will afford satisfaction in later years.

There can be no question of the value of this plan, often exists in the minds of bright boys and girls as to the best way in which to invest their talents and education. It appears to be a life task that will help them for the future and then leave them in a quandary as to the best way to spend their money. Often it means a more opportunistic way any real relation to the fitness of the one concerned. This leads to casual employment and even to unemployment and tragedy. The unskilled worker is usually the first man to be sent to the hard times and also is usually the most likely to be sent to reserve to meet economic misfortune. An innovation of this nature would seem to be a step in the right direction. It is a step in the right direction.—(Evening) Leader-Post.

## Some Horic Facts

Interesting Details Of The Cost Of Providing Feed For Animals

The report of the Dominion Animal Husbandman, Federal Department of Agriculture, furnishes the following interesting details on horse costs: It took an average of 100 pounds of oats, 100 pounds of hay, 100 pounds of carrots, and 100 pounds of salt. With maintenance added to feed these 100 horses cost \$256.32 for the year. It cost \$269.18 to raise a filly foal the first year, and \$416.65 the second. Feeding five foals a period of nine months cost \$22.22 each.

## A Strange Diet

When tea was first introduced into England, the people were sometimes puzzled as to the preparation of it. As an instance it is recorded that a lady of Penrith, having been sent a pound of tea, and not knowing how to use it, she boiled the whole up in milk, she then sat down with some friends to eat the leaves with butter and salt. They wondered afterwards how such a diet could appeal to anyone.

## Increase In Florist Business

At the second annual meeting of the Medicine Hat Greenhouses, Limited, it was pointed out, in the directors' report, that while it would be reasonable to expect the flower business to be amongst the first to suffer in a period of financial depression, there had actually been an increase in the volume of sales by the company.

First inventor: "What are you working on now?"

Second: "Perpetual motion."

First: "What's the matter with the instant system?"

It isn't what a man stands for, as much as what he falls for.

The balcony scene in "Romeo and Juliet" is on the radio.—Lionel Sacha, Leipzig.

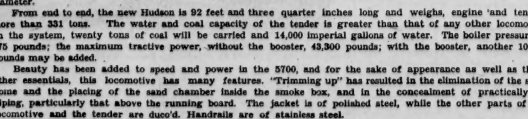

## Fastest Steam-Driven Giant on Wheels

The fastest steam-driven giant on wheels ever to make its appearance in Canada, the Hudson locomotive, 3760, was released September 16, from the shops of the Montreal Locomotive Works, to haul the new Canadian Pacific train, "The International Limited," of the Canadian National System, from Montreal to Chicago. This is the first of a family of five. The remainder will be delivered within a month.

To keep to schedule, 3760 will sometimes have to travel at the rate of 80 miles an hour. Its driving wheels are 80 inches in diameter, the largest in Canada. The drivers of the monster 6100 are seven inches smaller in diameter.

From end to end, the new Hudson is 92 feet and three quarter inches long and weighs, engine and tender, more than 351 tons. The water and coal capacity of the tender is greater than that of any other locomotive on the system. Its 2,400 imperial gallons of water will be carried in 1200 imperial gallons of water. The boiler pressure is 275 pounds; the maximum tractive power, without the booster, 43,300 pounds; with the booster, 10,600 pounds may be added.

Nearly as has been added to speed and power in the 3760, and for the sake of appearance as well as those other essentials, this locomotive has many features. "Trimming up" has resulted in the elimination of the sand dome and the placing of the sand chamber inside the smoke box, and in the concealment of practically all piping, particularly that above the running board. The jacket is of polished steel, while the other parts of the locomotive and the tender are done. Handrails are of stainless steel.

# High Protein Content Of Western Wheat Is Revealed In Tests Just Completed

Canada's current wheat crop has a very high protein quality of grade and shows higher protein content than any of the past three years, it is revealed in tests just completed for the Canadian Grain Commission.

Results of the tests, conducted by F. J. Birchard, commission chemist, at Winnipeg, were reported yesterday by F. G. T. O'Hara, deputy minister of trade and commerce. Summing up, it may be stated the general bulk quality of the present crop is fully equal if not superior to that of any crop tested since inception of the commission laboratory in 1913, says the report.

"The quality of the protein (gluten) is excellent and the average amounts of 13.4 per cent. compares very favorably with the previous years," Mr. Birchard reports. "The average for 1929 was 13.3 per cent. for 1928 was 11.6 per cent. and for 1927 was 11.6 per cent."

"The high protein content of excellent quality, the unusual dryness of the wheat and the excellent quality of this year's crop should be of special interest, particularly to the millers of England, France and Germany, since the crops of these countries are reported to be suffering severely from the effect of excessive moisture and consequent damage to the quality of the grain."

"Over 60 per cent of the crop received data in the tests. The representative grades in No. 1 Hard or No. 1 Northern, 23 per cent. grade No. 2 Northern, and only three per cent. No. 3 Northern. Very little grade No. 3 Northern or lower is being received at the present time. Practically no tough or damp crops have been received."

"The weight per bushel of the different grades is practically the same as that of last year, though the weight of the No. 3 Northern is received to date is lower."

"The comparative yield of flour from the different grades is about the same as last year with the exception of that from No. 3 Northern, which on account of the lower weight per bushel, is somewhat lower."

"Practically all the wheat is sound and mature, bringing little difference between the baking quality of the grade samples from which the test were made were gathered from the three provinces of the prairies, and are characterized as fairly representative of the crop as received to date. Relatively little Alberta wheat was present in the samples tested, however, and character of Nos. 3 and 4 Northern may change somewhat as to weight and flour yield."

The report approves standards for Nos. 1 Hard, 1 and 2 Northern, but sets only tentative standards for Nos. 3 and 4 Northern and Nos. 4, 5 and Special. "This, it is stated, is due to the fact that it is considered probable that some frost-damaged wheat from the northern districts may appear later."

The three special grades in the tentative standards, it is mentioned, are likely to take care of a certain amount of sound wheat, but of low weight per bushel. Flour yield from these grades is greatly reduced, and the color is very yellow, but baking quality is otherwise excellent.

## Buy Graded Beef

**Blue Brand Grade Is Preferred By the Average Customer**

The Beef Grading Service of the Dominion Department of Agriculture is stimulating public interest in the buying of good beef and each week shows more conclusively that where quality counts beef is bought by grade. Buying beef by grade is the only way you can be sure that the beef you will like. The grade "Choice" is always branded in red, and the grade "Good" in blue. The blue is the grade preferred by the average customer and is the grade in greatest supply.

Heavy plates of jade were used as tablets on which to carve writings in ancient China.

"Have you any rat poison?"  
"No, but we can let you have a gas oven."—Kasper, Stockholm.

W. N. U. 1857

## Demand For Canadian Apples

Several Thousand Boxes To Be Shipped To The Orient This Year

Until last year the Canadian-grown apple was an unknown delicacy in China. Some shipments were made to Hong Kong during the latter part of 1928, and the Chinese, like Oliver Twist, want more. The year it is expected that several thousand boxes of Canadian apples will go forward to the Orient for the Canadian Trade Commissioner at Hong Kong advises that Chinese importers are now interested in the Canadian-grown fruit.

The high quality of Canadian apples has been demonstrated at the Imperial Fruit Show, held annually in the British Isles, where for several years Canadian exhibitors have been awarded the medals of the most coveted prizes. Year after year the judges have agreed that the McIntosh Red, an apple of rustic complexion and incomparable flavor, is the best dessert apple in the world; this apple originated in Dundas County, Ontario, over a century ago.

The finest apple crop in Canada, it is estimated, is about 3-113,000 barrels.

## Cost Of Crop Production

Potatoes Showed Greatest Profit In Experiment Conducted At Ottawa

Some interesting experiments concerning the cost of producing farm crops have been made by the Canadian Government, Central Experimental Farm, Ottawa. For example, it cost \$30.62 to produce an acre of oats and \$34.00 of wheat; this cost of producing hay in 1929 was found to be \$19.90 an acre for hay cut and \$24.00 for ensilage crop. It was worth an acre of mangels, it cost \$72.45 an acre to produce the crop and the yield of 17.81 tons per acre, valued at \$19.17, was worth only \$34.02; or, mangels showed a loss per acre of \$38.43. Potatoes on the other hand proved a particularly profitable crop, showing a surplus of \$97.94 an acre over cost of production; potatoes cost \$50.90 per acre to produce and yielding 126.4 bushels, valued at \$93.85, showed an acreage value of \$178.93.

## A Longevity Record

Ayrshire Cow Has Made Money For Its Owner

A striking instance of the longevity and productive qualities of the Ayrshire breed is furnished by Violet, a member of the herd of S. J. Chaplin, Agassiz, B.C.

Bred and raised by William Macle, formerly of Agassiz, Violet was born on July 11, 1912, and is thus over eighteen years old. Yet, despite her age, in her last lactation period she produced 11,453 lbs. of milk and 424 lbs. of butterfat. This figure is a record being made on twice-a-day milking under ordinary farm conditions.

## Cork Airport May Be Base

German engineers have been surveying Cork airport for a site and are able for a contemplated base for a regular trans-Atlantic aerial service. The plan of the engineers is to institute weekly dirigible service between Cork and Lakehurst, N.Y., with Zepplins capable of carrying 120 passengers and 10 tons of mail, in addition to the crew of 48. The cost of such a dirigible is estimated at about \$1,900,000.

## Guard Against Gases

Forming in the Silo

Two Poisonous Gases Which May Occur in Any Silo

Before entering the silo the farmer or any one working for him should make sure that no deadly gases are present, is the admonition of silo experts of the Dominion Department of Agriculture.

At Herron, North Dakota, the other day, the Methanum family, father and four children, had their lives snuffed out by what was reported to be Methane gas. The sheriff who attempted to recover the bodies was overcome and barely escaped with his life, after his son had made two attempts to get his father out of the silo.

Methane and carbon dioxide are the two poisonous gases which are likely to occur in any silo. They have their origin in the decomposition of organic matter. Methane (CH<sub>4</sub>) is an odorless, inflammable gas which occurs naturally as the product of the decomposition of organic matter, and is frequently met with in manure and mires, being more familiarly known as marsh gas. Carbon Dioxide (CO<sub>2</sub>) is a heavy colorless irrespirable gas which extinguishes flame. It is produced by the action of acids on carbonates, through fermentation, and the decomposition of organic substances.

Both these gases may be present in the silo and owing to the fact that they are heavier than air as they accumulate, they force air away from the top of the silo.

As neither Methane or Carbon Dioxide will degenerate within a few days, it is always well before entering a silo during the filling season, to run the blower a few minutes to insure an adequate circulation of air. At other times, a lighted lantern should be lowered into the silo to insure that no gas is present. If Carbon Dioxide is present the flame will immediately go out.

There is just as much danger from poisonous gases in the silo as there is in an old well but the danger is one which may be easily guarded against and is overcome by an adequate supply of fresh air. An enflame fan fed from the top of the silo should be taken to see that the doors are open to allow free ventilation. Fresh air should be supplied as directly to the top of manure as possible.

## A Big Business

Agricultural Wealth Of The Dominion Reaches Nearly Eight Billion

Few people appreciate the dollar value of agriculture in Canada, or realize that it is really a big business. The Dominion Bureau of Statistics estimates the agricultural wealth of the Dominion as for the year 1929, at the huge sum of \$7,678,633,000. This figure is made up of the following estimated values: Lands, \$3,261,061,000; buildings, \$1,882,884,000; implements and machinery, \$666,172,000; livestock, \$864,167,000; poultry, \$63,854,000; animals for farms, \$29,891,000; agricultural products, \$1,667,218,000.

## Her Reason

The sick man was well again. "Mary, I shall never forget it," he told his wife. "Your sweetness to me has been like a golden cord in my memory. Why do you do it?"

He paused dramatically, hoping to hear a whispered confession that her love was the great motive. Instead she replied calmly: "Well, John, who wants a widow with four children?"

## A Cow With a Record

Belvedere Dekub Rukh—82632, of the herd owned by the Canadian Pacific Railway at Strathmore, Alberta, made the third highest mature record in Canada in 1929, being exceeded by one cow in the Strathmore herd and an outstanding cow in Saskatchewan. On June 14, 1929, she made a record of 27,892 pounds of milk and then went out on the Show Circuit, taking first prize at Brandon and first at Vancouver, Victoria and New Westminster. What she did is seen by comparison with the milk record of average dairy cows in several of the Canadian provinces which produce less than 4,000 pounds of milk annually. In 1929 she took first at Brandon and Edmonton. In reproduction, too, Belvedere is outstanding, for her four-year-old heifer sold in Toronto last June for \$1,525, 75 hundred dollars over the next highest priced animal and made a record of 38,423 lbs. of milk in 1929, exceeding the highest record made by a four-year-old in Canada in 1929 by more than two tons of milk.

# Moist Heat As a Health Factor Should Be Considered In Heating Homes During Winter Months

A family's health and comfort during the winter months, in this or any climate, depend on proper heating more than any other single factor. Family physicians will confirm this. Knowing the essentials of healthful heat is therefore necessary if a householder is to not only win this important question.

A healthful summer atmosphere is made up of temperature, air motion and humidity. Temperature alone is not the major problem of home heating, however. The first requisite for healthful, artificial heat is that it provides sufficient humidity to meet the requirements of the body. This is recognized and cannot be ignored except at the expense of health and comfort. Hot dry air in homes may be directly blamed for the 30 per cent. increase in the mortality rate during the winter months. The importance of moisture in the air breathed cannot be stressed too much.

Most heat as a health factor should be given first consideration when making a choice of the system to be installed in a home, for upon it will depend the health of the family. Medical authorities recommend that room temperature never exceed 70 degrees Fahrenheit. To remain in an atmosphere heated above this point lowers both vitality and resistance to disease. The body's ability to combat the cold is impaired by the contrast between indoor and outdoor temperatures.

There are still other benefits from correct humidity besides the health of the family and that is the economy in fuel bills. It costs more to raise the temperature from 70 to 75 degrees than from 60 to 70 degrees, and moist air at 70 degrees is far more comfortable than dry air at 75 degrees.

The old days it was thought that the atmosphere in the home became vitiated of its oxygen as the air was made fast, charged with carbon dioxide exhaled from the lungs. Recent conclusive experiments disprove this. Occupation of the home actually decreases the amount of oxygen therein and increases the amount of carbon dioxide, but the results of this are so negligible that the difference is hardly measurable or detectable.

In this country of cold winter climates there are three distinct types of heating equipment and each has its advantages and disadvantages. The stove, while crude in many respects, has many advantages over some types of apparatus. The most common types of equipment are the radiator—which may be either steam, hot water or vapor—and the register, which is used on many and varied kinds of warm air plants.

The operation of these different types of plants affect the occupant of the home. The radiator type heats the home by means of the air in each individual room, passing over each individual radiator and picking up what heat it can as it passes over. When the fire is high, naturally the radiator type of warm air furnace, except in the room, which causes the temperature to rise more quickly, and as the fire burns lower the air slowly moves. These radiators and connections must be absolutely water tight, or else they will leak, and except for the most modern type radiator, there is no chance of any humidity unless supplied by pans or other devices attached to the radiator.

Neither is there any possibility of circulation except by the action caused by the heated radiator, as mentioned. Somewhat the same action is obtained with the average type of warm air furnace, except that the body of the furnace over which the air passes, by being conducted through the radiator, is much hotter than the radiator, and the air is expanded to a greater degree and purged by being intensely heated, and creates much more action than when passing over the radiator. "It has been proven by medical men that a warm air furnace can be operated in contagious hospitals with scarcely any ventilation, and with the air in adjacent rooms. This is due to the temperature of the air as it passes the hot furnace and the rapid circulation of the various crops, planted and harvested at different times, are grown in rotation.

## Crop Rotation

The Most Efficient Way in Which To Maintain the Fertility Of the Soil

The maintenance of soil fertility is absolutely essential to successful farming. Unless the soil is in a fertile condition it is impossible to produce large crops and large crops are a prerequisite to profitable farming; observe field husbandry experts of the Dominion Department of Agriculture. The adoption of a good system of crop rotation involves no additional expense and is the most effective way in which to maintain the fertility of the soil and thereby increase the yield of farm crops. In addition, crop rotations assist in the control of weeds, and help to keep in check insect pests and other attacks. The labour of the farm, too, is better distributed throughout the season when suitable crops of various crops, planted and harvested at different times, are grown in rotation.

## Holding Doesn't Pay

Holding Eggs For a Rise in Price Considered To Be Bad Practice

The Poultry Division of the Dominion Department of Agriculture calls attention to the fact that it doesn't pay to hold eggs for a rise in the market. Past experience proves that holding eggs is a decidedly unwise practice and does only harm to the egg trade in general, particularly when eggs are held under conditions other than up-to-date cold storage. The old practice of country farmers to keep eggs for mixing with fresh stock on a favourable market has almost entirely disappeared and is now being graded about the old eggs up at. Consumers who pay the price for real fresh eggs expect to get what they buy. Eggs should be shipped promptly to market at all seasons of the year.

## An Interesting Experiment

Honey Kept For Fifty-Eight Years Resembles Blackstrap Molasses

Fifty-eight years ago a hive of honey bees made some white clover honey that has been kept by the United States Department of Agriculture and tested at intervals throughout a half century or more. Once almost colorless, this honey now resembles blackstrap molasses. Its original flavor has changed until it now tastes considerably like buckwheat.

However, this honey would not be out of place on steaming hot cakes or waffles at this time, but for the fact the department plans to use it indefinitely or until it is no longer fit for consumption, testing it from time to time to note changes. All kinds of honey darken after the first few years, and the flavor also changes.

## Divorce Easy In Russia

A two-hour glimpse of the workings of a Soviet divorce "court," described by an eye witness, gives eloquent testimony to the complete breakdown of the sanctity of marriage under Bolshevik rule. Application to a girl in charge of the registry office is the only formality needed to secure the necessary certificate of marriage or divorce in the court.

He—"So you don't want to marry me?"  
She—"That's different! You said something about being your forever."

## New Mining Regulations

Mining syndicates and individual prospectors are being advised that under the new mining regulations for Manitoba, since the taking over from the Federal Government of the natural resources, the assessment work requirement is now only 25 days instead of 40 days.

Dealer: "It's a genuine antique, sir."

Customer: "But you are asking a fearful price for it."  
Dealer: "Yes, but look how waxes and the cost of materials have gone up!"

"You say your grandfather's age is 184? Noises!"  
"Well, he died in 1800 aged 100, and now it is 1930."—Pages Gales, Yverdon.

"I have you any rat poison?"  
"No, but we can let you have a gas oven."—Kasper, Stockholm.

## Some Of World's Biggest

Patriotic Statisticians Have Proved France Has Her Share

"The biggest in the world" so often has been the mucous shout after achievements in the United States that the French have been rather annoyed. Yet, some of their inquiring minds of late have dug up world's records. When Dieudonne Coste and other French came in past month brought back half the world's air records to France, patriotic statisticians added to those achievements these other "biggest" things:

The Eiffel Tower, highest structure in the world.

The biggest reinforced concrete bridge, at Saint-Pierre-du-Vauvert.

The biggest metal viaduct, at Vieux, in the Cevennes Mountains.

The fastest electric train, from Bordeaux to Bayonne, 123 miles at a shade under 60 miles an hour.

The biggest aviation hangars at Orly.

The biggest airport at Le Bourget.

The biggest underground canal in the Rhone just outside Marseilles.

The most powerful searchlight, that at Mount Valerien, just west of Paris, developing a billion candle-power and throwing a beam of light over a hundred miles.

The world's fastest warship, the cruiser "Tourville."

The biggest wireless station at Saint Asaise.

FOR MANY FIGURES

All Tingley models are created and sketched in Paris and the patterns are made in New York.

A stunning apron dress this, and suitable for many figures. It is modish and chic for the normally built woman, and will also have a slender effect for the heavier type.

For the short girl it is snappy too, as the long-line belt, hip point and skirt panel all have long giving qualities.

Note the smart new vestee, too, which buttons out on top one side instead of lacing in at such affairs generally do.

See the wool georgette, silk marocain, or white spotted crepe with satin lining.

These models will make a nice, dressier scheme for the heavier woman.

This pattern may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 5 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name, address, the number of the pattern and the size you want.

# LEASURE

The tingling taste of fresh mint leaves is a real treat for your sweet tooth.

## WRIGLES

Affords people everywhere great comfort and long-lasting enjoyment. Nothing else gives so much benefit to a small cost.

It is a wonder how much work and play — keep you cool, calm and contented.

## WORLD HAPPENINGS BRIEFLY TOLD

Canada has twelve factories for the manufacture of macaroni and the annual production has a value of about a million and a half dollars, according to the latest figures from Ottawa.

Premier James H. Scullin, of Australia, making his first appearance before the League of Nations Assembly, denounced armaments as a menace to peace and urged the League to call a general disarmament conference.

A cable received by the Child Welfare, Inc., New York City, has its administrative committee in China, said 5,000 children are dying as a result of famine and that war and communism are adding difficulty to the situation.

The committee which will administer the War Veterans' Allowance Act, was appointed by the late Federal Government, and its personnel is now preparing for the operation and administration of the act.

The superannuation of E. R. Cameron, K.C., as registrar of the Supreme Court of Canada, was announced at the Prime Minister's office at Ottawa. He is succeeded by James F. Snelle, K.C., a lawyer of Ottawa.

Portage la Prairie, Man., known for its No. 1 hard wheat, has added new income to the town. On the farm of J. Frost, one mile from the town, peanuts and almonds have been produced this season. He grew two sacks of peanuts and a half peck of almonds.

James C. Brady, former Conservative member of parliament for Skeena, B.C., has been appointed a census commissioner of the demography branch of the Dominion Bureau of Statistics. Brady will organize the census of institutions such as hospitals, asylums, penitentiaries, and house of refuge all over Canada.

## New Market in Egypt

Tral Shipment of Apples Being Made From Ontario Valley

A new market for British Columbia apples in Egypt is being opened up by a trial shipment there, under arrangements completed by the provincial department of agriculture.

This shipment will consist of 2,000 cases from the Okanagan Valley at a price to net the growers a profit which would be small in a domestic market but satisfactory in an export market. The agricultural department believes that Egypt will offer a large market for British Columbia fruit in the future and is anxious to cultivate this business. A few apples from this country have found their way into Egypt before, but the market has never been built up in a big way.

"My wife used to play the piano a lot, but since the children are here she doesn't have time."

"Children are a comfort, aren't they?"

Mrs. M. Milner, aged 86, is still busy making cane seats at Wycombe, England.

## PATENTS

A List of "Patent Investments" and Full Information Sent Free on Request. THE RAMSAY CO. 375 BANK ST. OTTAWA, ONT.

NO LONGER SUFFER FROM INDIGESTION, COLIC, BRUISES, AND ALL OTHER AFFECTIONS OF THE DIGESTIVE SYSTEM. FRUIT-A-TIVES. CHOCOLATE ALL THROUGH.

## Scenic Automobile Route

Endorse Lake Superior Route For Trans-Canada Highway Through Northern Ontario

At a meeting of representatives of the Port Arthur and Port William city councils and chambers of commerce, held in Port Arthur, and addressed by John Lang and R. A. Gibson, delegates from South St. Marie, a resolution was adopted, moving the Lake Superior route for the proposed trans-Canada highway through northern Ontario.

The meeting was unanimous and accepted the view that while the cost per mile of construction might be slightly higher, the aggregate cost, because of saving in distance, would be considerably less than for the proposed alternative routes further to the north, and felt also that it would open up a scenic route second to none on the continent.

It was further believed that with a time saving of one day over any other possible route for such tourists as would make the circuit, it would be a much greater attraction for visitors from the south.

In order to get action on the matter, the Port William Chamber of Commerce sent time ago adopted resolution, approving a compromise route which would touch Chapeau and Oba, considerably to the north and adding 145 miles to the 475 miles between Port Arthur and the Soo. Representatives present at the meeting said the Port William Chamber was willing to reconsider the matter and join Port Arthur and the Soo in urging the all-ake shore route.

## COLLEGE DAYS

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Are you needing a cute little dress for return to class, or may be your first venture into the world of business? Here's a dashing style, so fresh and chic!

Neath the web belone jacket, the dress is held by simple shoulder straps.

One of the new season's closely woven jersey trevies would be lovely for this model—the collar and cuffs are pique. Plain or spotted crepe silk could also be used or almost any dress weight woolen of the plain or two-tone.

For afternoon wear, the model in charming developed in maroon, flannel, or broadcloth, when naturally the collar and cuffs will be of fine tulle, perhaps lace or embroidery of contrasting silk or satin.

This pattern may be obtained in sizes 14 to 20 and 24 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully giving plainly your name and full address, the number of the pattern and the size you want.

## School For Film Plan

Mining Town In Northern Manitoba Town To Have Public School

Efforts of the mining town of Film Plan to have modern public school instruction this year have at last been successful, according to word received in The Pas. Equipment is now being installed in the class rooms, and it is expected that work will begin within ten days.

Financial plans are about complete. With grants from the province, town, and with the aid of the Hudson Bay Mining and Smelting Co., grants up to eight will be taught this year. It has been decided to engage Miss Doris M. Foster, of Winnipeg, to teach the primary grades, and Miss Margaret Sutherland for grades three, four and five.

## Find Early Coins

Interesting Discovery In Vale Of Gold Coins Minted In 1340

Thirty golden nobles, in perfect condition and apparently fresh from the Mint where they were struck to celebrate the death of the French king by Edward III, at Sully, in 1340, were discovered recently on the edge of an ancient road leading from Talleis, Cardiganhire, to the Dovey Estuary, where a ferry in olden days carried travellers across to North Wales.

The coins depict an English warship bristling the waves and surmounted by the English coat-of-arms and the King's head.

## Recipes For This Week

(By Betty Barclay)

### BREAKFAST MUFFINS

2 cups special cake flour, sifted.  
4 teaspoons baking powder.  
1/2 teaspoon salt.  
1 egg, well beaten.  
3/4 cup milk.  
4 tablespoons butter or other shortening, melted.

Mix flour, egg, measure, add baking powder, salt, and sift again. Combine egg and milk, add to flour, beating until smooth. Add shortening. Bake in greased muffin pans in hot oven (400 degrees Fahrenheit) 25 minutes. Makes 10 muffins.

### BAKED FISH

1 average fishfilet filleted flounder, freshaddock or whiting.  
2 tablespoons butter.  
Salt and pepper.  
1 lemon.

Grease a plate and lay the fish on it with the skin side up. Put in the oven five minutes and the skin can be easily removed. Melt butter in a flat pan, lay fish on it and place in hot oven 400 degrees Fahrenheit, eight to ten minutes. Baste twice while baking. Remove season and squeeze lemon juice over. Serve hot.

## Tour To The Orient

Business Men To Sail On Chamber Of Commerce Tour To Japan and China

Several business men of Edmonton and Calgary have already signified their intention of joining the Canadian Chamber of Commerce tour to the Orient, which sails from Vancouver on the "Empress of Asia" on October 16th. The tour will include a visit to Japan and reception by the Japanese Government and trips to Shanghai, Nanking, Hong Kong and Canton, and the members will be back before Christmas. The tour is not limited to members of Chambers of Commerce and Boards of Trade, but is open to the general public as well.

In many parts of Africa there is a tree which bears large seeds resembling huge sausages.

## A Shaving Lotion

When mixed with sweet oil, Minar's serves as an after shaving lotion and astringent. Soothes and freshens the skin.

## Wins First Prize For Layer Cake

At the Canadian National Exhibition, Toronto.

There were a large number of entries of cakes of various kinds and Mrs. McKenzie not only won first prize for layer cake, but also for muffins and small cakes. We give below the recipe used by Mrs. McKenzie for the prize-winning cake.

Golden Layer Cake—1/2 cup butter; 1 cup sugar; yolk of 1 egg; 1/2 cup milk; 1 1/2 cups flour; 4 teaspoons Magic Baking Powder; 1 teaspoon of orange extract. Cream butter and sugar, add well beaten yolks and beat again with butter and sugar until very light. Sift flour and add to first mixture alternately with milk. Beat lightly for about one minute, put into greased layer pans and bake. Temperature 400 degrees Fahrenheit. Time 20 minutes. Put together with lemon filling and ice with boiled frosting.

Lemon Filling—1 lemon and rind; 1 cup cold water; 1 cup sugar; 1 egg; 1 tablespoonful flour. Beat lemon rind and egg together. Stir in lemon juice and sugar. Dissolve flour in water. Cook in double boiler till it thickens and spreads.

Boiled Frosting—Dissolve a cup of granulated sugar in 1/2 cup of hot water. Wash down the sugar from the sides of the pan, cover and let boil three or four minutes and uncover and let boil a rather firm soft ball.

Four in a tin from the whites of 4 eggs, beaten dry, beating constantly meanwhile. A few Maraschino cherries chopped and added to the frosting gives a delicious and pleasing flavor.

## Alberta Dairy Record

Last Year 95 Creameries Produced Sixteen Million Pounds Of Butter

The dairy record of the Province of Alberta is an encouraging one. In 1912 the province had only 53 creameries producing a little over 3,000,000 pounds of butter. Last year there were 95 creameries with an output of 16,000,000 pounds. In 1912 six cheese factories produced but 40,000 pounds of cheese, while last year ten factories produced over a million pounds.

In days of yore if anybody missed a stage coach he was contented to wait two or three days for the next one. Now, however, the time he misses one section of an evolving door.

Calculating machines, similar to those used for tabulating census returns, are being used in the British Columbia squaw to determine daily positions of the moon until the year 2000.

Twenty-eight rural municipalities in the Province of Saskatchewan have been established as pure-bred sire areas, which means that these areas have become entirely free of scrub sires.

Calculus machines, similar to those used for tabulating census returns, are being used in the British Columbia squaw to determine daily positions of the moon until the year 2000.

## SUNDAY SCHOOL LESSON

OCTOBER 5

ZACHARIAS AND ELISABETH — Life In A Pious Jewish Home

Golden Text: "And they were both devout and full of good works, walking in the commandments and ordinances of the Lord blameless."—Luke 1:6.

Lesson: Luke 1:5-8.

Devotional Reading: Psalm 122.

Explanations and Comments

A Righteous Couple, verses 5, 6.—In the days of Herod, King of Judaea (Herod the Great, who reigned from 37 to 4 B.C.), there lived a priest named Zacharias, of the course or group of Abiathar. "David divided the priests into twenty-four courses, each of which in rotation was responsible for the temple services for a week. Each course, therefore, officiated twice a year, at an interval of six months. After the captivity only four courses returned, but these were subdivided into twenty-four courses under the old name. The course of Abiathar is said to officiate in April and October. The wife of Zacharias, who was a descendant of Aaron, was called Elisabeth. Their home was in the hill country south of Jerusalem. Both were righteous and full of good works, which the Jews observed the Mosaic law, kept all the commandments, and were not without faith, but blameless according to the Old Testament standard.

The Birth and Naming Of John the Baptist.—John the Baptist was born, all his neighbors and relatives rejoiced with him. "There is nothing else in the world so important as children, nothing else so interesting."—David Starr (Jordan). Those present at the circumcision of Zacharias and Elisabeth were eight, and wished to name him Zacharias after his father, but Elisabeth said, "Not so, but he shall be called John." See verse 13. "John" means "the grace of God." "There is none of thy kindred that is called by this name." They said in astonishment and turned to the father, they asked him the name should be, making use of signs, for he seems to be deaf as well as dumb. (Verses 15-20.)

Five words, said Zacharias forty weeks' silence."—Thomas Fuller. "Various suggestions have been made to evade the conclusion that he was deaf, that men are very apt to treat a dumb person as if he were also deaf; that they communicated by signs limited only by speech to spare the feeling of Elisabeth, whose judgment was being appealed from; that a sign was all that was needed, Zacharias having heard all that was said."—The Exposition of the Bible.

Zacharias called for a writing tablet and wrote with wax, and Elisabeth it he wrote with a stylus. "His name comes out."—The Exposition of the Bible.

Then Zacharias burst forth into speech, blessing God. The people were amazed, because he was now given the name, and they perceived that some great future was before the child. "What, in view of these things, shall this child be called? For the hand of the Lord was with him," the Evangelist comments.

Pure Bred Sire Areas.—Twenty-eight rural municipalities in the Province of Saskatchewan have been established as pure-bred sire areas, which means that these areas have become entirely free of scrub sires.

Calculating machines, similar to those used for tabulating census returns, are being used in the British Columbia squaw to determine daily positions of the moon until the year 2000.

## HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 3 months. I have continued every morning. I then weighed 217 pounds, was always bedridden, and was in my back and lower part of abdomen and sides."

"Now I am glad to say I am a well woman, feel much stronger, years ago, and my friends say, 'I shall never be without Kruschen Salts, will never cease taking my daily dose and more than glad to highly recommend it for the great good it is in it.'—Mrs. A. Schonen."

"I do not only feel better but I look better, so all my friends say."

"I shall never be without Kruschen Salts, will never cease taking my daily dose and more than glad to highly recommend it for the great good it is in it."—Mrs. A. Schonen.

## Canned Chicken

New Business Is Likely To Develop Into Large Proportions

In his annual report recently published the Veterinary Director General of the Dominion Department of Agriculture calls attention to the increase in the number of poultry products processed under government inspection. The packing trade is canning more meats and poultry in Canada, and it appears to be room for considerable development in the field of canned chicken. Canned whole chickens made its appearance on the market last year and from the report accorded it the new business is likely to develop into one of considerable proportions.

## Strength Of Canadian Woods

A comparison of strength values of wood of sugar maple and yellow birch shows that sugar maple is considerably the stronger in the green condition, whereas, after seasoning, they are of approximately the same strength. This is revealed through publication of results of the physical and mechanical properties of Canadian woods by the Forest Products Laboratories of Canada, Department of the Interior.

There is a Manchester squire who believes in agriculture, as witness this entry: "Died—male, aged three months, cause—farting." Which leaves no possible doubt.

## When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a teaspoonful in water. It is pleasant, efficient and

harmless. It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know you're sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions and a sample.

In that stuffy corner of the First National Bank's No more horrible death when he got a raise, for fear his uncle would claim it for added bonus. No more stifling of natural impulses. How had he endured those years? "I've been a slave," said Nick, pointing beneath an ancient apple tree, "but I'm a slave no longer. I can conquer the world!"

Then, because he knew he was behaving like a foolish little boy, he laughed at himself, and reaching up picked a spray of apple blossom, breathing deeply of it.

"May!" he exclaimed. "May in New England—and I'm free! Gee! how I've longed for just this moment. I'm going to start out with no cares or responsibilities—without even a destination, and all my possessions in a blue bandanna! As Gay would say, 'I'm free!'"

He stopped, suddenly, at an amazing thought. He had forgotten to say his good-byes. He had not even said good-bye to his father, who was now alone in the world like himself. He might need a passport—but no, that wasn't fair. He must immediately, and with his dreams and encouraged him to believe they would come true, as they had, in the last busy days of settling affairs, he had forgotten her.

"An ungrateful scoundrel!" he told himself, and thought it meant retracing his steps, and the risk of passing Selina Smith's back windows, and the possibility of being seen, and rewarded by the sight of a pink-clad figure bending above some budding rose. Nick whistled softly, and starting up the girl faced him.

"You're off to sea?"

The color that danced in her face might have come from her sudden change of attire, or from emotion. Nick never saw it, so what was it in his own affairs.

"Yes," he said. "Did you suppose I'd stay here mourning my dear late uncle? Don't look so shocked, Gay. I needn't pretend to you, need I, that I'm leaving?"

"I'm not shocked," the girl protested instantly, "only surprised. I've never seen anything every day that you run in."

"My dear, I've been dead in—puck your eye!"

She laughed, proudly displaying his handkerchief and stick.

"The girl laughed too, and said: 'I'm not going!'"

"Where?" Nick looked at her reproachfully. "Have you shared my plans so sparingly all these years, Gay, that you ask that question?"

He turned to the ends of the earth.

There were both arms wide, as if to embrace the universe, and Gay smiled a wistful smile that caught at the corners of his heart which hitherto had remained untouched.

"I wish I were a man, Nick."

He answered, his eyes devouring her sweet girlishness: "You're pretty nice as you are. I don't think I'd want you changed, Gay; and I don't believe you would change, if you could."

She sank down on the grass beside the jonquils, and, as if he had forgotten his haste to be away, Nick sat beside her, his hands clasped round her knees.

"No," she said honestly, "I wouldn't change, of course; but if I must be wonderful to start off as you are starting, Nick. Do you suppose I, too, don't long to go 'to the ends of the earth'?"

Like living here with Sadie Twichell, and sewing on women's clothes in order to pay my board?"

Nick looked at her, his brows drawn into a frown.

"You know," he admitted, "I never thought of it. It's because you're a girl. Somehow one doesn't expect a girl to go gypsy-ing, though the extra shoulder—Gay, he broke off suddenly, "what pigs men are!"

She laughed.

"One would hardly call you that, Nick, after the way you stuck by your Aunt Nettie."

"But I am," said Nick, still frowning. "I came to say good-bye to you."

(his honesty made him want to re-

veal the fact that in addition he had almost forgotten the farewell, but his kind heart forbade the disclosure that he knew would hurt her, "I came to say good-bye, never thinking that you, too, might long to do what I am doing. I'm ashamed of myself, Gay. What must you think of me?"

"I think," she said, meeting his eyes soberly, "that you're getting just what you deserve—a good time. What do you think of me, to imagine for a moment that I don't rejoice with you? Nick, you're a boy, and you've never had much fun. Why shouldn't you be a little thoughtless? I—believe I'm glad you are!"

He stirred, a little uneasily, while Gay added with an understanding smile: "I mustn't keep you. I know you're another at the party."

She arose, leaning down to brush an imaginary something from her skirt, and as he got to his feet she stretched out a friendly hand.

"Good-bye, Nick. The best of luck to you."

He took her hand, squeezed it hard, and lifting the stick and bundle, said, with a gaiety that was a little forced: "Well, I'm off. Till you see me again, wherever I am."

A postcard from California, or Alaska, or Timbuctoo, or wherever it happened to land, good-bye, old friend."

He found it unaccountably difficult to meet her eyes, so didn't meet them. He got away. He got as far as the stone wall that divided Miss Sadie's land from Selina Smith's. Then he turned, though even as he did so something warned him that it was dangerous to look back. He turned squarely about, his hand raised in a last salute.

Gay was standing just where he had left her, but it seemed to Nick that all the buoyancy of youth had dropped from her. She was leaning against the gnarled trunk of an old apple tree, with the jonquils at her feet and the pink, sweet blossoms all above. In her pink gown, he should have looked the embodiment of spring; but in reality she dropped, like a stone, and he saw her lean, hard hand and left to die. Nick couldn't bear it. He tossed his stick and bundle, emblems of freedom, to the ground, and strode back; while Gay, pulling herself together, ran to meet him.

"Did you forget something?"

"Yes," said Nick. "I forgot the best friend I ever had, my lady. Listen—don't you ever come along?"

"With you?"

"Of course! You wouldn't be bulky. I've seen you widened at the amazing proposition."

"Fortunately for Gay there was a rustic to be found. He saw her stand breathlessly, and from emotion. Nick never saw it, so what was it in his own affairs."

"We could have the time of our lives," he urged. "I've always done things alone, but you—long—don't you ever come along?"

"I believe you are crazy," she said sharply. "What would people think? They'd say—"

"Oh, Lord!" Nick interrupted, with a characteristic grin. "I mean, of course, that we'd get married first."

"Get married!"

He laughed at her amazed first.

"Why not? It's better than being alone. We're both of age, you know. Why shouldn't we?"

"But—you don't love me."

"Nonsense! I love you a lot. Always have. Of course, if I bore you—"

Look for this mark on every tin. It guarantees Magic baking powder is pure and of the highest quality.

### Ancient Warship Discovered

Hull Armed With Heavy Iron Guns Found in Stockholm Canal

The hull of a 500-year-old Swedish warship, armed with heavy iron guns, recently discovered on the bottom of the Riddarholmen Canal, in the heart of Stockholm, has been pumped dry and is being raised to the surface. Archaeologists who have examined the relic believe it to be the oldest warship from the medieval period lifted from the bottom of the sea.

It is built of oak, low and slender in type, and seems to be a direct descendant of the Viking ships, which were among the best and most seaworthy boats ever constructed. Close by the ancient guns have been found round cannon balls of stone, lead and iron, and some iron powder chambers for the breech-loading guns of that period. Several cone-shaped pieces of hollow wood also have been brought to light, partly loaded with small pieces of flint and stone, which may have been primitive case-shot projectiles for close range firing. Below the deck, the gun ports, and some other interesting objects belonging to the equipment of the ship have been found.

The work of recovering the vessel is very difficult, but the hull itself is so well preserved that it may be possible to reconstruct the ship with its armament and rigging fairly complete.

### Is Fond Of Music

Ramsay MacDonald Listens In On Radio Broadcast Programs

Ramsay MacDonald, Prime Minister of Britain, is a great lover of music.

Speaking at the jubilee of the Guildhall School of Music in London, England, Mr. MacDonald said he had enjoyed many Sunday afternoon listening to the broadcast of Bach's church cantatas from the school.

"I confess that whether I am at home or in my quiet peaceful home, Hampstead or down at Chesham, the Prime Minister's official residence, he continued, 'I make it a rule to issue an order—and I am not given to that very much—that there shall be no engagement, no interference, no business, but that my friends and I shall retire to a quiet corner and spend a very inspiring, comfortable, and peaceful half-hour listening to the broadcasts.'"

Persian Balm—the ideal toilet requisite for every discerning woman. Results in perfect complexion. Creates a velvety smooth skin and stimulates the skin. Making it truly radiant. All daily women, invariably choose Persian Balm. It imparts that subtle distinction, characteristic of the elegant woman.

New Folder Of Canada

"Canada" is the title of a new folder that has been issued by the Department of the Interior, containing a concise summary of the country's natural resources, their potentialities and development. The folder also presents a very interesting map indicating natural resources and industrial areas in southern Canada, in addition to illustrations depicting commercial activity in the various provinces. A copy can be obtained from the National Development Bureau, Department of the Interior, Ottawa, Canada.

Nearly 1,400 automobiles a month are being imported into Sweden.

Russian export trade in chemicals is very active.

## MAGIC BAKING POWDER never varies

Its uniform leavening qualities give the same satisfactory results with every baking. 3 out of every 4 Canadian housewives, who bake at home, say they use it because it does give consistent, better baking results.

If you bake at home, the New Magic Cook Book will furnish you with dozens of attractive baking suggestions.

Try this Recipe for Muffins

1 tablespoon butter	3 teaspoons Maple
2 tablespoons sugar	Baking Powder
2 eggs	1/2 teaspoon salt
2 cups flour	1 cup sweet milk

Cream butter and sugar. Add eggs one by one, beat well. Stir dry ingredients together and add to first mixture alternately with milk. If batter not stiff enough, add a little more flour. Put in well-greased muffin pans and bake for 20 minutes in a quick oven.

\*This fact was revealed in a recent Dominion-wide investigation.

### Little Helps For This Week

"Blessed are they that keep my ways."—Proverbs, lvi. 32.

And oh! in my exceeding weakness, Make Thy strength perfect; Thou aid me to my way with meekness, And whom all my powers leave behind.

If thou wilt but go on with thy duties, desiring to love in such cases the desire of loving is love in His sight—the irksome dullness and dryness is the thorn in thy flesh, the messenger of Satan to buffet thee. But fear not; God's grace is sufficient for thee; His strength will be made perfect in thy weakness. Only set yourself in earnest to obey His voice. Say to Him, night and day, "Ishod the servant of the Lord! be it unto me according to Thy Word."

—John Keble.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum. Dr. Thomas' Electric Oil possesses power in concentrated form. The cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Feed Skim Milk

Feeding tests at the Cap Ruy Experimental Station of the Dominion Department of Agriculture show that it pays to feed laying hens skim milk. Five years tests show that with a basal ration of grain meal, shell and vegetable feeds, hens fed skim milk laid more eggs and gained more weight than hens fed beef scrap. Practically the cost of skim-milk is just one-ninth that of beef scrap.

Athletes recommend Minard's Liniment.

"He—if your father catches me sleeping tonight I wonder what he'll say to my mother?"

She—"Well probably say 'Sh-h-h'!"

There are almost 600 different kinds of parrots.

The third emigration is a striking indication of the conditions of tyranny prevailing in Soviet Russia. When government officials, presumably selected for their special zeal in the cause, desert the ship of state in considerable numbers there is reason to believe that the soviet system ought to be confined to Russia.

No Room For Argument

At an exhibition of paintings, records Sir John Ross, former Lord High Chancellor of Ireland (in his reminiscences, "Pillgrims' Scrip"), this conversation was overheard between two women who were looking at a picture, "The Dance of Salome."

"Now, what's that, Maria?" asked one.

Maria (glancing at catalogue): "Salome dancing for Herod."

"But he never does it, Maria!"

Maria (heartily): "He must do, else he couldn't be photographed."

Has Warm Job

H. B. Stevens, chief of the Royal Scot express, has spent 20 years of his life in a space of eight yards between the two end of the train, with a temperature that is mostly around 150 degrees. His train kitchen is an ingenious affair. The whole of one side is taken up by stores and tanks, and the other by collapsible tables on which food is prepared. Stevens and an assistant prepare meals for 200 in this tiny kitchen.

Minard's Liniment for Chest Congestion.

Lydia E. Pinkham's Vegetable Compound

Copyright 1920

### CHAPTER I

When, after years of slavery to the whims of a hard old uncle, Nicholas Hastings went forth on his quest for freedom, he started tramp-wise, his belongings tied to a blue-checked handkerchief which he had bought for the occasion. For years he had foreseen this departure from the home of his father, the haughty farewell he should bestow upon an

irate uncle—the tears of his gentle Aunt Nettie when he took her in his arms. But Fate frustrated those plans. His patient little aunt had been laid away in Elmwood Cemetery two months before, and only a week ago his uncle had followed her, as if, Nick thought with grim and scathing humor, he was loath to let her enjoy a peaceful residence in her Heavenly Mansion.

So there were no farewells to say. Instead, Nick left by the back door (because he didn't want Selina Smith, the village gossip, to see his stick and handkerchief), and stood for a moment looking at all the familiar landmarks.

His eyes swept the view from this little porch. An orchard sloped gently to a green interval, through which a sleepy river travelled to the sea. One wouldn't have dreamed that the house stood on a dusty thoroughfare. From here were visible only "green pastures and still waters." Nick could remember sitting here with his mother on summer evenings, and after his mother's death, with old Aunt Nettie. For a moment a wave of tenderness for the place swept over him; then youth flooded back with an intoxicating exhilaration. He slipped the door key into his pocket, and with no trace of regret vaulted the stone wall and strode across the orchard, where, once beyond the confines of curious neighbors, he would strike into the broad highway.

Free! No more tolling over ledgers

for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! That's comfort in every drop of this pure vegetable preparation, and the slightest harm in its frequent use. As often as your child has a feverish spell, feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes constipation, or diarrhea—a constant ailment—should always be checked without delay. Just keep Castoria handy and give it promptly. If it doesn't, you should call a physician.

## About Town and Country

Oyen's fall chautauqua starts in Oyen Theatre on Saturday evening, October 4.

Mr. C. M. Mair, teacher at Wavy Plain school, recently returned to his home in Stettler.

Rev. L. C. Scott, who is leaving for Cabri, Sask., this week, conducted his last service in Oyen on Sunday. He leaves for his new sphere of activity with the good wishes of his many friends in this district.

Mr. and Mrs. Lewis of Aeadia Valley left for B.C. the latter part of last week.

Miss Dorothy Fisher of Calgary is visiting at the home of Mr. and Mrs. David A. Peck.

The harvest thanksgiving service held in All Saints Church last Sunday was well attended. During the service, Barbara Edith, daughter of Mr. and Mrs. David A. Peck, was christened.

Miss Maud Moore of Edmonton, has commenced her duties at Wavy Plain school as teacher, in place of Mr. Mair, resigned.

Mr. Allan Denton who has been visiting at the home of Mr. and Mrs. William Denton of Benton, is returning to Vancouver this week.

Mr. and Mrs. McMillan are now comfortably installed at Excel station, where the former is local agent.

The Sunday school picnic held last Friday evening in the United Church, proved a very enjoyable affair for the young people. The function was well attended.

With a continuance of the present fine weather, threshers expect to be at work again the latter part of this week.

"Turn to the Right" Saturday evening at Oyen Theatre.

Mr. Harry Anderson recently received the sad news of the death of his mother, which occurred in Los Angeles, Calif.

Miss Annie Forgie left yesterday for Youngstown, where she will commence duties at the telephone exchange as day relief operator.

Miss Jean Elder, agent for the fall chautauqua, arrived in Oyen yesterday morning.

The district meeting of Masonic District No. 14, will be held in Hanna, on Monday, October 13, when it is expected many distinguished brethren will be present.

Born—To Mr. and Mrs. J. R. Acheson of Oyen, on Wednesday, October 1, 1930, a daughter.

Mr. Gordon Caswell's car which was stolen from his garage last week, has been found at Loyalist, Alta. A report from Loyalist states that five men seen boarding a train at that point are believed to have been in Oyen on the Sunday previous to the car being stolen. The thieves apparently abandoned the car when it became stuck in a mud hole and broke the rear end.

The popular sportsman Mr. Art Waide, is building himself a boat. Whether this is being constructed under the belief that there is going to be a flood or to be used in pursuit of the elusive duck, remains to be seen. Names for the aquatic craft thus suggested are "Shamrock VI", "Noah's Ark", "The Tumbling Mustard" (hot stuff).

Mr. William Frizell of Sils, was a week-end guest at the home of her mother Mrs. J. Long.

## ABSOLUTE CONFIDENCE

### IN LIGHTER VEIN

No Doubt  
"I ain't got no use for books," said an ancient cab-driver. "I never did care for 'em, but as I can't read, that may have sommat to do with it"—Passing Show.

Fair Proposition  
"Sir," said the maid quite haughtily, "either take your arm from around my waist or keep it still, I'm no ukelele."

A married man, much against his own inclination, had to attend a fawceny dress ball with his wife. Dressed as a Roman warrior, he soon found the short, airy robes quite draughtily. Feeling thoroughly disgruntled, he sat out in a corner. Came along a bright young thing anxious to air her knowledge of Roman historical heroes, who said to him: "Ah! You are 'Appius Claudius'. No, I'm not," he retorted. "I'm miserable as hell."

Stating that the Canadian Chamber of Commerce official tour of Japan and China leaving Vancouver and Victoria October 16 aboard S.S. Empress of Russia, offers a splendid chance to emphasize Canada's position as a trading nation. Col. J. H. Woods, Calgary publisher and president of the Canadian Chamber of Commerce, speaking to 300 members of the Vancouver Board of Trade in an address at the Hotel Vancouver recently, urged Canadians to take full opportunity of the chance afforded by the tour.

Canada's wild life has a capital valuation of one billion dollars and represents a yearly business turnover to the Dominion of about \$45,000,000. Dr. H. F. Lewis, of the Department of the Interior, told the delegates to the Provincial Dominion game conference at Ottawa the other day. The valuation includes the fur harvest, game fish and their attendant effect upon the manufacturers of firearms and fishing tackle not to mention railways, tourist camps, magazine publishers and others who derive a certain revenue from this source.

Budgets will be won by all big game hunters in New Brunswick during the season opening September 15 for deer and October 1 for moose. During the recent year all non-resident anglers in New Brunswick have worn badges and the system has proved so satisfactory as to render extension of the plan to shooting advisable.

This year's crop of grapes in the Niagara fruit belt, between Hamilton and Niagara Falls, Ont., is expected to reach about 15,000,000 lbs. an increase of 15 per cent over the 1929 crop. The crop is now being harvested.

A shipment of 128 live cattle from a farm in Ontario went westward recently to England, the first in 18 months. It was consigned to buyers in Manchester. The shipment, though comparatively small is regarded by the live stock trade as marking resumption of Canada's export trade in cattle to the British market.
